

SOLIDARITY TOWARDS THE STRUGGLE OF THE ITALIAN WORKERS

The National Federation of Workers in Public and Social Functions of Portugal salutes and accompanies the General Strike called by the USB for the next 10th November in defence of their rightful demands that sustain and show that the neo-liberal politics are sectional to all countries, namely in Europe.

Such politics determine the destruction and privatization of the public services like education, health, social security, the privatization of strategic sectors of the economy, the destruction of the quality of the employment through the imposition of job insecurity and the uncertainty in the worker's lives, as well as the at the same time, only the protection of the interests of the great national and transnational capital is their main goal.

So, against this politics, the only way is the struggle.
Long live the struggle of the workers of the public and private sectors!
